About

The third meeting in a series focused on challenges and opportunities for sustainable artificial intelligence (AI) and energy systems, which will be held over 2025 as part of the Energize AI collaboration journey under the Artificial Intelligence Governance Alliance (AIGA) AI Transformation of Industries Initiative.

Participants will include cross-industry C-suite and senior experts from various companies adopting or looking to adopt AI systems at an operational level, and other relevant industry actors. They will share perspectives, discuss relevant updates and align on community priorities for the way forward. This is an invitation-only event and will be held under the Chatham House Rule.

Topics

SDG 9 - Industry, Innovation and Infrastructure   Generative Models   Artificial Intelligence and Robotics
